

PECKERS RESTAURANT GROUP

Rota & Cash Flow Management System

System Requirements Specification – Stage 1

Document Ref	PRG-SRS-001
Version	1.1 (Draft)
Date	May 2026
Prepared By	Peckers Management
Status	Draft – Pending Review
Classification	Confidential

Version History

Version	Date	Author	Description
1.0	May 2026	Peckers Management	Initial Stage 1 Requirements Draft

1. Introduction

1.1 Purpose

This document defines the Stage 1 functional and system requirements for the Peckers Restaurant Group Rota and Cash Flow Management System. The system is designed to centralise workforce scheduling, automate wage calculations, and provide real-time visibility of daily staffing across all Peckers store locations.

1.2 Scope

Stage 1 covers the following two store locations:

- Stevenage Peckers
- Hitchin Peckers

Future stages will extend the system to additional locations. The platform will be web-based and accessible to authorised users from any device.

1.3 Intended Audience

- Store Managers – primary system users responsible for scheduling.
- Super Admins (Rishi & Sanjay) – cross-store oversight and verification
- Development Team – implementing the system based on these requirements

1.4 Definitions & Abbreviations

Term / Abbreviation	Definition
KTM	Kitchen Team Member
NI	National Insurance (PAYE / on-the-books payroll)
Cash-in-Hand	Off-payroll wage payment; tracked separately from NI wages
Rota	Weekly staff scheduling timetable
Live Dashboard	A real-time daily view showing current staffing status across both stores
Vita Mojo	Third-party ordering platform used for delivery tracking
Labour %	Total wage cost expressed as a percentage of total revenue for the period
4-Week Avg	Rolling four-week average of hours worked, used as a baseline for anomaly detection

2. System Overview

The system consists of three integrated modules:

Module	Description
Rota Management	Weekly staff scheduling by store, with shift entry, day-off tracking, and auto-calculation of weekly hours and wages.
Live Daily Dashboard	A real-time view showing who is working, who is expected, and who is on a day off — across both Stevenage and Hitchin. Updated from the rota management system.
Cash Flow Management	Daily cash reconciliation, delivery pay-out tracking, envelope logging, and discrepancy resolution. (Detailed in Stage 2.)

3. Rota Management Module – Stage 1

3.1 Overview

Each store has a dedicated weekly rota. Managers enter shift times, rest days, and pay rates for each employee. The system automatically calculates hours worked and wages owed (split by NI and cash-in-hand) for the current week, as well as a four-week rolling average.

3.2 Rota Data Fields

Each employee record on the rota must capture the following fields:

Field	Type	Notes
Employee Name	Text	Full name of the staff member
Position / Role	Dropdown	e.g. Manager, Kitchen Team Member (Supervisor), Driver.
Hourly NI Rate (£)	Numeric	On-payroll hourly wage rate
Hourly Cash-in-Hand Rate (£)	Numeric	Off-payroll hourly wage rate (leave blank if not applicable)
Monday – Sunday Shifts	Text / Time	Shift start and end times, or 'Day Off' where applicable.
Total Hours This Week	Auto-calculated	Sum of all hours worked in the current weekly rota
Average Hours (4-Week)	Auto-calculated	Rolling average of hours worked over the previous four weeks
Total Wages (NI + Cash)	Auto-calculated	Combined wage total. Hovering over this field displays a pop-up showing NI and cash-in-hand amounts separately.
Deliveries – 4-Week Average	Numeric (Manager entry)	Manager enters weekly delivery average on the rota each week, with reference to Vita Mojo figures.
Deliveries – Live Count	Numeric (Driver entry)	Updated daily by the driver via the crew web app. Manager cross-checks against Vita Mojo each morning.

4. Employee Management

4.1 Employee Profile

When adding a new employee to the system, the following information must be recorded:

Profile Field	Notes / Validation
Full Name	Required
Date of Birth / Age	Required – used for minimum wage compliance checks
Gender	Optional – for HR reporting purposes
Position / Role	Required – selected from a predefined list
Employment Start Date	Required – used to calculate length of service
Length of Service (Years)	Auto-calculated from start date
Hourly NI Rate (£)	Required for payroll calculation
Hourly Cash-in-Hand Rate (£)	Optional – leave blank if not applicable
Store Assignment	Required – Stevenage Peckers or Hitchin Peckers
Bank Details	Required – employee's full name, bank name, account number, and sort code
Employment Status	Active / Inactive / Left

4.2 Manager Permissions

Authorised managers must be able to perform the following actions:

- Add a new employee and complete the full employee profile
- Edit any existing employee's details (name, position, rates, personal info)
- Mark an employee as inactive or remove them from the active rota
- Reassign an employee to a different store
- Update NI and cash-in-hand hourly rates individually
- Edit hours and shift times on the same day — for example, if an employee needs to leave early due to an emergency. A mandatory reason field must be completed when making same-day edits (e.g. 'Left early – family emergency', 'Called in sick').

5. Crew Web App – Clock-In & Rota Access

5.1 Crew Member Access & Geofencing

Every crew member requires individual login access to a dedicated web app. The app must provide the following functionality:

- Clock In / Clock Out: Clear options to log the start and end of each shift.
- Location Restriction (Geofencing): Clock-in and clock-out must only function when the crew member is physically within a 2–3 minute walking radius of either the Stevenage or Hitchin store premises, preventing off-site logging.
- Live Rota Visibility: Crew members can view their upcoming shifts for the week. The rota must update in real time whenever the manager makes changes — including mid-week adjustments.
- Driver Delivery Entry: Before clocking out, drivers must have an option to enter the number of deliveries completed during their shift. This figure must automatically sync to both the rota management system and the live dashboard.

5.2 Automated Rota Syncing & Variance Tracking

The crew web app must integrate with the manager's rota system as follows:

- Automated Hours Syncing: Total hours worked (based on clock-in/clock-out records) must automatically update in the management rota and trigger a status change on the live dashboard.
- Scheduled vs. Actual Comparison: The system must display both the scheduled hours (as entered by the manager) and the actual hours worked (from clock records), showing the exact difference.
- Discrepancy Flagging: If the difference between scheduled and actual hours is significantly high or low, the system must automatically flag the entry for manager review.
- Manager Notes: A text field must be available on all flagged entries so managers can record an explanation or reason for the discrepancy.

6. Live Daily Dashboard

6.1 Overview

The Live Daily Dashboard provides a real-time, at-a-glance view of staffing across both Peckers stores for the current day. It is visible to all authorised users — managers, Super Admins, and any other designated read-access users — and updates automatically as crew members clock in and out via the web app.

The dashboard is not used to edit shifts or pay data. It is a read-only status board, with the sole purpose of answering the question: who is working right now, who is coming in today, and who is the manager on shift?

6.2 Information Displayed

The dashboard must display the following information for each store, for the current day:

Field	Detail
Store Name	Stevenage Peckers or Hitchin Peckers — clearly labelled as separate panels or tabs
Date & Day	Automatically shows today's date and day of the week
Manager on Shift	Prominently displayed at the top of each store's panel — name and shift times
Employee Name	Full name of each scheduled crew member for today
Role / Position	e.g. Kitchen Team Member, Driver, Supervisor
Scheduled Shift Time	The shift hours as entered by the manager on the weekly rota
Clock-In Time (Actual)	The time the employee clocked in via the crew web app (auto-populated)
Clock-Out Time (Actual)	The time the employee clocked out (auto-populated)
Current Status	Live colour-coded status: On Shift, Expected, Clock Out, Day Off (see key below)
No. of Deliveries (Drivers)	Running total of deliveries entered by the driver for today

6.3 Status Colour Coding

Each employee row on the live dashboard must be colour-coded based on their current status:

Status	Meaning
On Shift	Employee has clocked in and is currently working
Expected	Shift scheduled but employee has not yet clocked in
Clocked Out	Employee has completed their shift and clocked out
Day Off	Employee is not scheduled to work today
TBC	Shift data not yet entered by manager

6.4 Access & Visibility

The live dashboard must be accessible to the following user types:

Role	Access Level	Detail
Manager	Read + Write	Can view live dashboard for their own store and update the rota

Super Admin (Rishi & Sanjay)	Read + Write (all stores)	Can view live dashboard for both Stevenage and Hitchin simultaneously
Read-Only (Future)	Read only	Can view who is working but cannot make any changes

The dashboard must be viewable on any device (desktop, tablet, mobile) without requiring any installation. It should be the default landing screen when a manager or Super Admin logs in.

6.5 Sample Daily View

The table below illustrates what the live dashboard should look like on a typical day. This is an example only — actual shift data is entered by managers each week.

Store	Employee	Role	Shift	Status
Stevenage	Swathi	Manager	11:00 – 21:00	On Shift
Stevenage	Tharun	KTM (Supervisor)	10:00 – 22:00	On Shift
Stevenage	Jyothi	Kitchen Team	12:00 – 20:00	Expected
Stevenage	Pavan	Driver	13:00 – 21:00	Expected
Stevenage	Afrid	Driver	Day Off	Day Off
Stevenage	Rohith	Driver	14:00 – 22:00	Expected
Stevenage	Sandeep	Kitchen Team	11:00 – 19:00	Clocked Out
Hitchin	Manager TBC	Manager	—	TBC
Hitchin	Staff TBC	Kitchen Team	—	TBC

Note: Hitchin Peckers rows are shown as 'TBC' in this example as staff data has not yet been provided. Once entered, the dashboard will display Hitchin staff in the same format as Stevenage.

7. Initial Staff – Stevenage Peckers

The weekly rota template for Stevenage Peckers is included in Appendix A. Hitchin Peckers staff data to be provided before development begins.

8. System Alerts

The system must proactively notify managers when predefined thresholds are breached. All alerts must be visible on the manager dashboard and optionally delivered via email or SMS notification.

8.1 Wage Alerts

WAGE ALERTS

	
	
	
	Significant variance from average hours – triggered when an employee's hours this week deviate by more than 20% from their four-week rolling average.

8.2 Delivery Alerts

DELIVERY ALERTS	
	
	Unusually high delivery payouts – triggered when total driver delivery pay for the week exceeds a configurable threshold, or when an individual driver's payout is significantly above their four-week average.
	Unassigned deliveries – triggered when the extra deliveries are made which are not available on vita mojo. And a reason box should show up (usually they might have done drop offs)

8.3 Cash Alerts

CASH ALERTS	
	Repeated cash shortages – triggered when a store records a cash shortfall on more than two occasions within any rolling seven-day period.
	Missing envelope entries – triggered when a daily cash envelope entry has not been submitted by the expected close-of-business time.
	Unresolved discrepancies – triggered when a cash discrepancy has been flagged but not signed off or resolved within 24 hours.
	Large single-day variance – triggered when a day's cash intake varies by more than a configurable amount versus the same day in the prior week.

8.4 Live Dashboard Alerts

LIVE DASHBOARD ALERTS	
	Late clock-in – triggered when an employee has not clocked in within 15 minutes of their scheduled shift start time.
	
	Unexpected absence – triggered if a scheduled employee has not clocked in and no same-day edit or reason has been recorded by the manager.
	Early clock-out – triggered if an employee clocks out significantly earlier than their scheduled shift end time and no reason has been entered.

9. Non-Functional Requirements

Requirement	Detail
Access Control	Role-based access: Manager (add/edit/delete for own store), Super Admin – Rishi & Sanjay (full cross-store access and verification). Live dashboard available to all authorised users.
Data Security	All employee data (pay rates, bank details, personal information) must be stored securely. Full GDPR compliance required.
Auditability	All changes to records, rates, and rota shifts must be logged with a timestamp and the username of the person who made the change.
Mobile Compatibility	The system — including the live dashboard — must be fully usable on tablets and smartphones (responsive design).
Real-Time Updates	The live dashboard must refresh automatically without requiring a manual page reload. Target: status updates visible within 30 seconds of a clock-in or clock-out event.
Performance	Rota pages and wage calculations must load within three seconds. Dashboard must load within two seconds under normal network conditions.
Backup & Recovery	Data must be backed up daily. In the event of data loss, the system must be recoverable to within 24 hours of the incident.

10. Out of Scope – Stage 1

The following items are acknowledged but deferred to later stages of the project:

- Hitchin Peckers rota (structure to mirror Stevenage; staff data to be provided)
- Full cash flow module including daily takings, envelope tracking, and reconciliation reports
- Vita Mojo API integration for automated delivery syncing – to be explored; may not be technically feasible
- Holiday and absence management with accrual tracking
- Automated monthly payroll submission to accountant (NI hours only)
- Read-only dashboard access for non-manager staff

11. Open Questions & Assumptions

#	Topic	Detail
1	Hitchin & Stevenage staff data	Full staff names, positions, and pay rates for both stores will be provided.
2	Alert thresholds	Configurable thresholds (e.g. labour %, hours variance, late clock-in window) to be agreed with management prior to build.
3	User roles	Manager: add/edit/delete. Super Admin (Rishi & Sanjay): full read and cross-verification. Confirm if any additional roles are needed (e.g. read-only for non-manager staff).
4	Geofencing radius	Confirm the exact geofence radius (currently specified as 2–3 minutes walking) and whether this differs between stores.

5		
6	Dashboard display preference	separate tabs per store.

Appendix A – Stevenage Peckers Weekly Rota Template

Week Commencing: _____

Employee Name	Position	NI Rate (£/hr)	Cash Rate (£/hr)	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday	Total Hrs (Week)	Avg Hrs (4-Week)	Wages (NI + Cash)	Deliveries (Avg 4wk)	Deliveries (Live – Driver)
Swathi	Manager	£13.00	N/A	11:00–21:00	Day Off										
Tharun	KTM (Supervisor)	£13.00	£8.20	10:00–22:00	Day Off										
Jyothi	Kitchen Team Member	£12.71	£7.20												
Pavan	Driver	£12.71	£7.20			Day Off									
Afrid	Driver	£12.71	£7.20		Day Off										
Rohith	Driver	£12.71	£7.20												
Sandeep	Kitchen Team Member	£12.71	£7.20												

Notes: Shift times: HH:MM–HH:MM (24-hour). Mark rest days as 'Day Off'. Wages are auto-calculated. Hovering over Wages (NI + Cash) shows a breakdown pop-up of NI and cash-in-hand separately.

Deliveries: 'Avg 4wk' entered weekly by manager. 'Live' updated daily by each driver via crew web app and cross-checked against Vita Mojo each morning.

Manager Sign-off: _____ Date: _____ Expected Total Wage Bill for the Week (£): _____
